## The Argentine stock markets in the context of world stock market indexes

Better economic indicators, posted by both the Eurozone countries mostly affected by the crisis (Greece and Spain) and the United States boosted the majority of the Stock Exchanges in the “developed world”, which ended 2013 with significant positive variations.

However, the last part of the year saw greater volatility as a result of investors' increasing uncertainties as to the progressive effects of the reduction in the monetary stimulus (or “tapering”) by the FED.

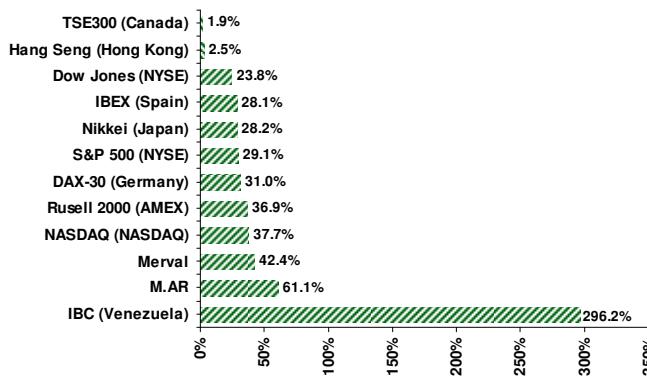

If we take a glance at the 25 stock market indexes, which the Argentine Institute of Capital Markets (IAMC in its Spanish initials) surveys on a daily basis, we can note that 18 posted hikes (all measured in US dollars) in comparison with year-end 2012, while only 7 recorded a fall.

The stock market index that saw the highest jump was that of Venezuela (296.2%), followed by those of Argentina: M.AR (+61.1%) and Merval (+42.4%).

On the other hand, the Turkish stock market dropped by 26.9%, followed by Brazilian Bovespa, which posted a fall of 26.6%.

### The 10 best-performing Stock Markets in 2013

Variations in US dollars between 12-30-13 and 12-28-12

It should be noted that in the last quarter of 2013, the Argentine stock market indexes experienced a remarkable recovery, which enabled them to finish the year among the three best-performing markets on an annual basis. It is worth mentioning that this scenario had not taken place since 2010. Over this period of four months, the Merval index was up by 35.6% in dollars, while M.AR advanced 51.5%.

## Performance of Local Stocks

If we take a look at the 10 best-performing stocks (in pesos) in 2013, only 2 are comprised in the Merval index. The ranking was topped by Solvay Indupa (INDU) with a 356% rise, followed by Edenor (EDN) and Consultatio (CTIO), with hikes of 234.9% and 202.3%, respectively.

### The 2013 top-ten stocks

Stocks	Annual Variation	
	In ARS	In USD
1. Indupa (INDU)	356.0%	243.5%
2. Edenor (EDN)	234.9%	152.3%
3. Consultatio (CTIO)	202.3%	127.7%
4. YPF (YPFD)	198.7%	125.0%
5. Grupo Clarín (GCLA)	170.6%	103.9%
6. Banco Galicia (GALI)	156.1%	92.9%
7. Caputo (CAPU)	151.1%	89.2%
8. Quickfood (PATY)	130.7%	73.8%
9. Carboclor (CARC)	128.9%	72.5%
10. IRSA (IRSA)	127.8%	71.6%

It is worth mentioning that out of the 10 best-performing stocks, the 8 stocks which do not make up the Merval Index stood for less than 5% of the total 2013 stock volume (Galicia, Tenaris, and YPF as a whole represented 48% of the total). This is why we consider relevant to analyze what happened with the price of the best traded stocks over the year.

As a result of the above mentioned, we can conclude that out of the 10 best traded stocks, all of which compose the Merval Index, 9 recorded an upward trend, while 1 went down, as shown in the following chart.

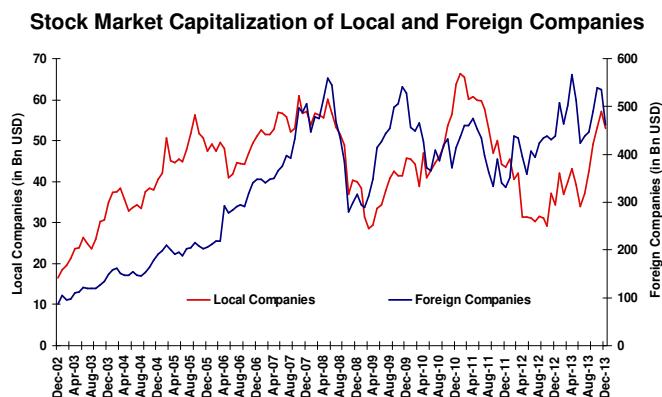

### 2013 Price Variations Top Ten Traded Stocks

Stocks	Annual Variation		Market share
	In ARS	In USD	
1. Grupo Financiero Galicia (GGAL)	108.1%	56.8%	17.59%
2. Tenaris (TS)	40.1%	5.5%	16.03%
3. YPF (YPFD)	198.7%	125.0%	14.57%
4. Telecom Argentina (TECO2)	106.9%	55.9%	8.45%
5. Petróleo Brasileiro - Ordinarias (APBR)	-5.0%	-28.4%	6.69%
6. Siderar (ERAR)	110.4%	58.5%	5.33%
7. Pampa Energía (PAMP)	94.8%	46.8%	4.72%
8. Banco Macro (BMA)	71.9%	29.5%	4.15%
9. Edenor (EDN)	234.9%	152.3%	3.18%
10. Petrobrás Energía (PESA)	53.8%	15.9%	3.12%

## Stock Market Capitalization

As of December 30, 2013 the total stock market capitalization stood at ARS3.4 trillion (USD514.5 billion), which represented a 45% rise in comparison with same period of 2012 (9% measured in dollars).

The local companies capitalization totaled ARS346.1 billion (USD53 billion), which implied a rise of 105.3% against year-end 2012 (56.4% in dollars). It is important to highlight that the market value, as measured in pesos, of the Argentine stocks at year-end posted an annual all-time high. It should be further noted, however, that this figure in US dollars was 20% lower than that of January 2011 (USD66.2 billion).

Out of the 78 local companies comprised in this calculation, only 7 saw their capitalization go down (the total reduction amounted to ARS75.7 million), while 70 companies recorded a total hike of ARS178.4 billion. Among the main rises, in terms of their impact on the total amount, YPF accounted for 43% of the increase, followed by Telecom Argentina (8.5%) and Banco Santander Río (3.3%).

In terms of GDP as of 3Q-13 (latest available), the stock market capitalization of local companies as of 12-30-13 accounted for 12.8%, against 7.2% posted on 12-28-12.

As for the capitalization of foreign companies, the amount reached ARS3 trillion (USD461.4 billion), which implied a rise of 40.3% as measured in pesos since the end of 2012. The 6 foreign companies saw their stock capitalization rise by as much as ARS863.9 billion, among which stood out Banco Santander accounting for 44% of the overall hike.

## Cash Dividends

Over 2013, the listed companies paid cash dividends in the amount of ARS35.5 billion (USD6.2 billion), 8% less than the previous year. This total comprises local companies in the amount of ARS4.02 billion while the remaining ARS31.5 billion was paid by foreign companies.

Unlike what happened in 2012, when the shrinkage in the distribution of cash dividends resulted from a lower payment by local companies, in 2013 the fall was accounted for in full by foreign companies. The latter

paid cash dividends in pesos for 12% less than the amount paid in 2012. As for local companies, however, it can be stated that they paid 37% more dividends than the previous year.

## Cash Dividends

Term	2013		2012		y/y
	ARS Bn	\$ Bn	ARS Bn	\$ Bn	
<b>1<sup>st</sup> Half</b>	<b>11.2</b>	<b>2.1</b>	<b>36.7</b>	<b>8.3</b>	<b>-33.6%</b>
Domestic	1.1	0.2	1.7	0.4	-80.6%
Foreign	10.1	1.9	35.1	7.9	-24.9%
<b>2<sup>nd</sup> Half</b>	<b>24.4</b>	<b>4.1</b>	<b>2.0</b>	<b>0.4</b>	<b>-96.0%</b>
Domestic	3.0	0.5	1.3	0.3	-74.7%
Foreign	21.4	3.7	0.7	0.2	-98.4%
<b>Year</b>	<b>35.6</b>	<b>6.3</b>	<b>38.7</b>	<b>8.7</b>	<b>-6.3%</b>
Domestic	4.0	0.7	2.9	0.6	-78.5%
Foreign	31.6	5.6	35.8	8.1	-60.9%

In terms of number of dividend-paying companies, we can conclude that 36 local companies paid dividends against 43 in 2012. As for foreign companies, 4 out of 6 listed companies paid cash dividends. It is important to highlight that Andes Energía and Banco Santander failed to pay cash dividends, although Banco Santander went on with its stock issuance scheme with an option to cash payment by virtue of a share subscription coupon, which resembles a cash dividend.

## Government Bonds

The fixed-income market, measured by the IAMC Bond Index, posted a favorable variation as of year-end 2013 against the previous year, both in pesos and dollars. The index in pesos showed a 41.6% hike, but if revised downward due to the exchange rate depreciation (32.6%), the rise stood at 6.7%.

The positive development of the IAMC Bond Index was sparked off by the hikes in all other sub-indexes, among which stood out the dollar-denominated ones. These led to a growing demand by investors of instruments denominated and payable in foreign currency due to the restrictions on the purchase of foreign currency.

The highest increase in pesos was recorded in the USD-denominated Long Bonds Sub-index, which had gone up by 56.7% since year-end 2012. In fact, this sub-index has the highest weighting of the four (39% of the total). The second best performing Sub-index was that of Short Bonds in dollars, which saw a rise of 52.6% and enjoyed the smallest weighting in the General Index (12.6%). The remaining sub-indexes (Short Bonds in pesos and Long Bonds in pesos), measured in dollars, paced up by 16% and 41.8%, respectively.

## Fixed-Income Market Performance – IAMC Bond Index ("Performing" Government Bonds)

### IAMC Bond Index in ARS (Base 1/1/95=100)

	Value as of Dec-30-13	Variation as from Dec-28-12	Weighting
Short Bonds in ARS	2,613.43	16.02%	30.49%
Short Bonds in USD	1,342.95	52.57%	12.56%
Long Bonds in ARS	3,103.86	41.79%	17.96%
Long Bonds in USD	2,522.82	56.66%	38.99%
IAMC Bond Index	2,576.69	41.59%	100.00%

### IAMC Bond Index in USD (Base 1/1/95=100)

	Value as of Dec-30-13	Variation as from Dec-28-12	Weighting
Short Bonds in ARS	1,197.83	-12.53%	30.49%
Short Bonds in USD	221.42	15.03%	12.56%
Long Bonds in ARS	1,021.27	6.90%	17.96%
Long Bonds in USD	387.45	18.11%	38.99%
IAMC Bond Index	395.43	6.75%	100.00%

If we analyze the top 10 performing government bonds over the year, it becomes evident that investors were particularly interested in instruments denominated and payable in foreign currency: 9 of all the bonds posting the highest increases are in dollars whereas the rest are in euros.

It is important to add that most of these bonds had been issued as a result of the debt restructuring processes undertaken by the National Government as well as that of the Province of Buenos Aires.

### 2013 Top Ten Performing Bonds

Bonds	Annual Variation	
	In ARS	In USD
1. Long Term Par Bond in EUR Province of Bs. As. Due 2035 (BPLE)	103.8%	53.6%
2. Par Bond in USD New York Law 2010 Swap (PAY0)	100.2%	50.8%
3. Cuasipar Bond in ARS Due 2045 (CUAP)	87.1%	41.0%
4. GDP linked bonds in EUR (TVPE)	83.5%	38.2%
5. Mid Term Bond in USD Province of Bs. As. Due 2020 (BPMD)	82.8%	37.7%
6. Province of Bs. As. in USD at 9.375% Due 2018 (BP18)	78.7%	34.6%
7. Par Bond in USD Argentine Law 2010 Swap (PAA0)	78.3%	34.4%
8. Long Term Par Bond in USD Province of Bs. As. Due 2035 (BPLD)	74.8%	31.7%
9. Dollar-linked Bond Due 2022 Province of Formosa (FORM3)	74.2%	31.3%
10. Discount Bond in USD Argentine Law 2005 Swap (DICA)	73.2%	30.5%

The bond that took the lead in terms of price increase was the Long-Term Par Bond denominated in Euros, issued by the Province of Buenos Aires (BPLE), which posted a hike of 103.8% in pesos. Ranking second was Par Bond in USD New York law (2010 swap) issued by the National Government (PAY0) and third, Quasipar Bond in Pesos (CUAP), up by 100.2% and 87.1%, respectively.

Just like stocks, find below the 2013 ranking of the 10 best performing bonds, which taken as whole stood for

around 82% of the total trading volume on the concurrence market.

It can be observed that all the securities had been issued by the National Government, 7 of which were denominated in dollars and the remaining 3 in pesos.

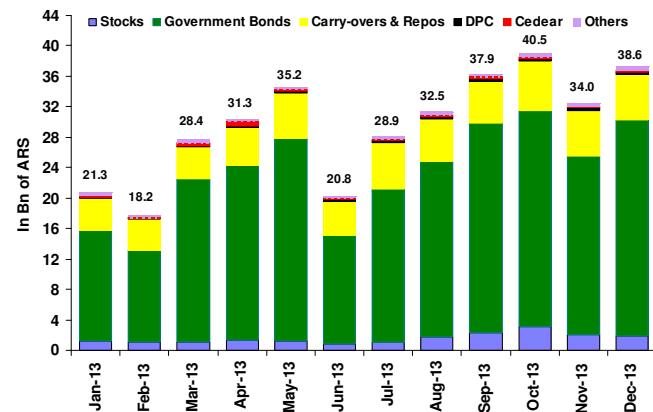

### 2013 Price Variation Ranking Top Ten Performing Bonds

Bonds	Annual Variation		Market Share
	In ARS	In USD	
1. BODEN in USD 7% - Due 2015 (RO15)	52.5%	14.9%	43.36%
2. BONAR X in USD 7% - Due 2017 (AA17)	44.5%	8.9%	16.55%
3. BONAR VII in USD 7% - Due 2013 (AS13)	37.5%	3.6%	7.91%
4. Global Bond in USD 7% - Due 2017 (GJ17)	45.0%	9.2%	2.95%
5. GDP linked Bond in ARS 2005 Swap (TPPP)	61.8%	21.9%	2.58%
6. Discount in USD Due 2033 New York Law 2005 Swap (DICY)	48.5%	11.9%	2.13%
7. BONAR in ARS BADLAR+275 bp - Due 2014 (AE14)	15.8%	-12.8%	2.09%
8. GDP linked Bond in USD New York Law (TPVY)	61.2%	21.4%	1.66%
9. Consolidation Bond in ARS 6th Serie 2% (PR13)	28.4%	-3.3%	1.28%
10. Par Bond in USD New York Law 2005 Swap (PARY)	55.9%	17.4%	1.22%

### Traded Volume

The total traded volume in 2013 stood at ARS367.8 billion, which accounted for a significant rise of 51.8% in comparison with the traded volume recorded in 2012 (ARS242.3 billion).

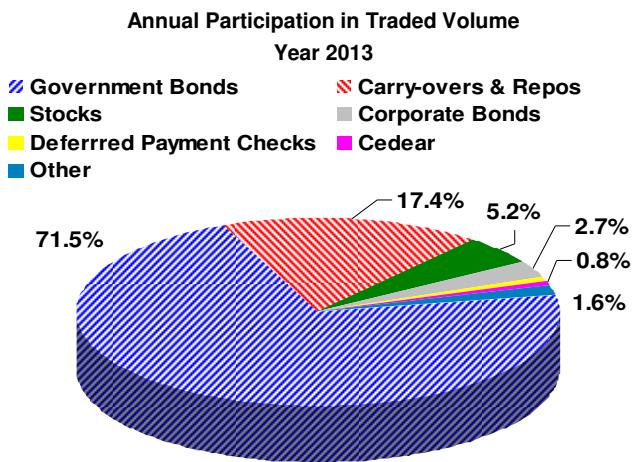

### BCBA Traded Value Year 2013

Most of the overall upward trend was fostered by the 58% increase (+ARS96.5 billion) in the volume of government bonds. The remaining relevant items saw some minor advances: Carry-overs and Repos + 6.7%, Stocks +7.2%, and Cedears +5.9%.

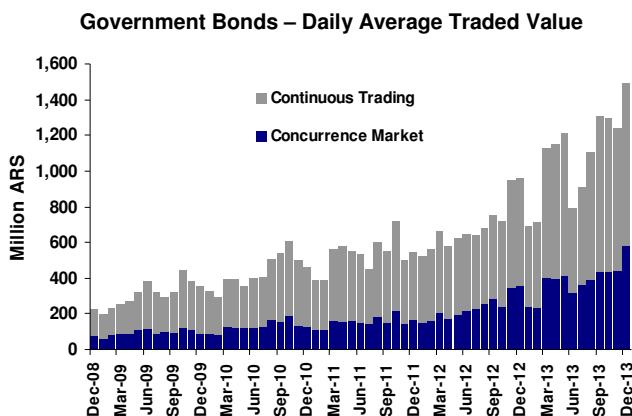

Once again, it must be noted that deferred payment checks performed very satisfactorily. Although they stood for a very small portion of the total (0.8%), DPC went up by 53.9% and recorded a total traded volume close to ARS3.03 billion.

If we analyze the volume composition, it can be noticed that the portion of government bonds increased from 68.6%, as recorded in 2012, to 71.5% in 2013. As a result, Carry-Overs and Repos as well as Stocks and Corporate Bonds saw their portions in the total traded volume of 2013 go down by a little more than five percentage points.

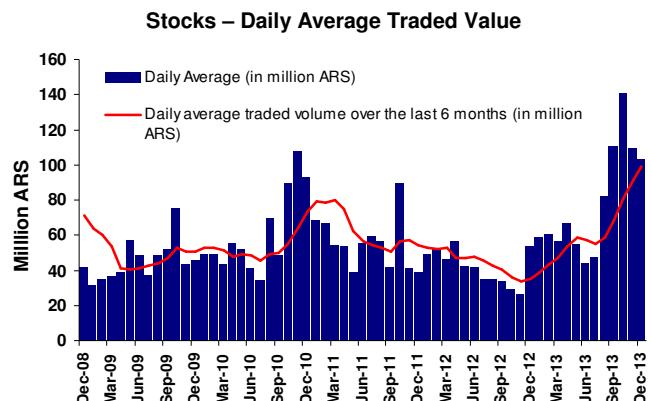

The total volume in pesos traded in government bonds over 2013 amounted to ARS262.8 billion, which is the second highest figure in the last 10 years (the previous all-time high was recorded in 2008 and stood at ARS172.3 billion).

The daily average traded volume in government bonds reached ARS1.09 billion, which entailed a 58% hike against 2012 and the highest amount since the abandonment of the Currency Board system.

Out of the total traded volume in 2013, 35.6% was traded on the concurrence market while the remaining 64.4%, in the continuous trading system.

As for the total volume traded in stocks, the daily average stood at ARS79 million against ARS41 million in 2012. This entailed an outstanding 90% rise and the highest figure ever recorded since 2008.

## Corporate Financing

The total corporate financing obtained through the local capital markets over 2013 totaled USD10.4 billion. This was a record figure and amounted to 34% more than the placements of 2012 (USD 7.8 billion). Out of this total, USD9.9 billion (95%) arose from genuine financing (also a record high), while USD528 million from debt restructurings.

### Corporate Financing through Local Capital Markets

Type of Company and Instrument	Total Financing in billion USD		
	2013	2012	y / y
<b>Total Big Companies</b>	<b>9.9</b>	<b>7.3</b>	<b>35.7%</b>
Corporate Bonds	5.1	3.9	32.3%
Financial Trusts	4.7	3.4	37.7%
Share Subscriptions	0.09	0.02	330.7%
<b>Total SMEs</b>	<b>0.6</b>	<b>0.5</b>	<b>17.3%</b>
Corporate Bonds	0.0	0.0	4.7%
Deferred Payment Checks	0.5	0.4	22.8%
Financial Trusts	0.1	0.1	-6%
Share Subscriptions	0.000	0.004	-100%
<b>Overall Total</b>	<b>10.5</b>	<b>7.8</b>	<b>34.5%</b>

94% of the 2013 financing (USD9.8 billion) was allocated to big companies, which represented a yearly rise of 35.7% as well as an all-time high. As for the financing of SMEs, it reached a peak of USD614 million thus breaking the 2012 record (USD524 million). Therefore, the portion of SMEs in the total financing was 6% in 2013 and grew by 17.3% against the previous year.

The jump in the financing to big companies was accounted for by the 32% rise in the placement of corporate bonds (CB) as well as the 38% increase in the issuance of financial trusts (FT). Over 2013 the placement of short-term debt securities (STDS) shrank by 52% on an annual basis, and there was only one share subscription in the amount of USD91 million by Endesa Costanera, USD78 million of which could be paid in through the capitalization of accounts receivable.

It is interesting to note that the rise in the FT issued amount was explained by the placement of Procrear 1 (October 2013) in the amount of USD1.4 billion. If we were to disregard this trust, the total placement amount over 2013 would have stood at USD3.2 billion, down by 4.8% against 2012.

62% of FT was related with consumption (54% personal and consumption loans and 8% credit cards). Real Estate and Mortgage FT accounted for 31% of the total, 98% of which was represented by Procrear 1. The remaining types of issued FT comprised the following: Leasing (2.7%), Farming (1.6% and most SMEs), Commercial Loans (0.8%), Public Works (0.4%) and Pledges (0.4%). Although represented by a smaller portion of the total (0.8%), FT for export financing (USD40 million) stood out for its return since there had been no record of it since 2009.

Regarding financing through CB and STDS, it reached USD5.1 billion, which was the highest figure ever recorded since 2003. This was achieved by 200 issuances: 178 CB and 7 STDS placed by 54 big companies and 15 SME CB issued by 15 SMEs, 7 of which used this instrument for the first time.

SME financing amounted to USD614 million over the year and was 100% genuine. This entailed a yearly rise of 17% and a new all-time record figure.

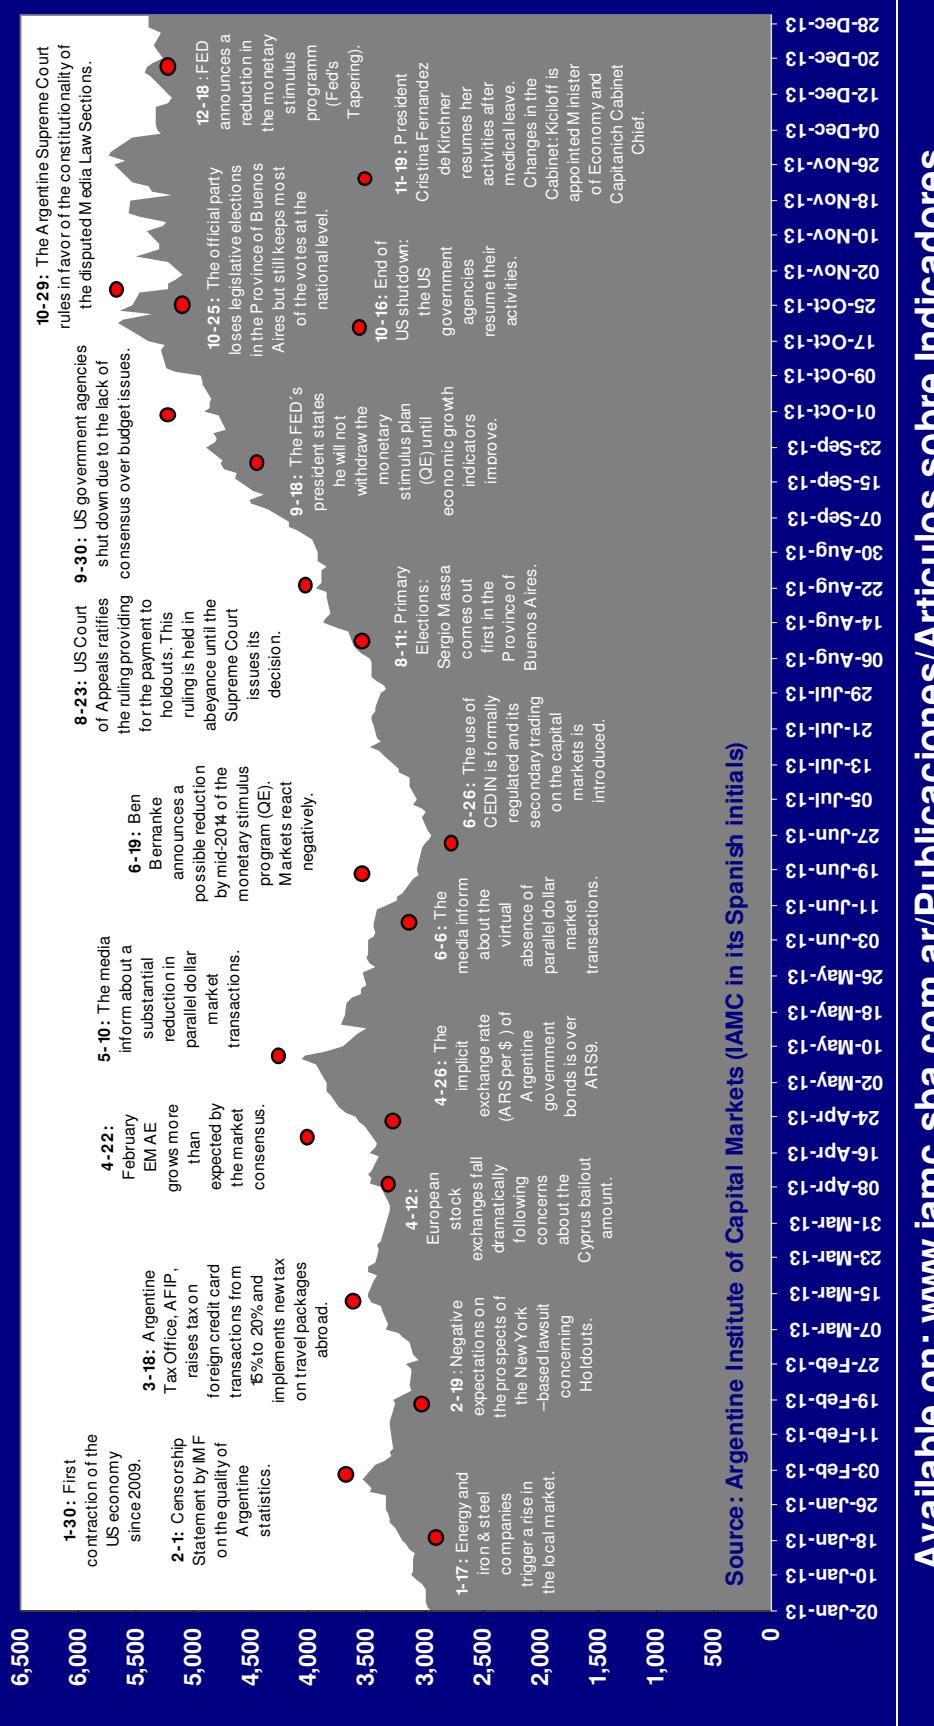

As for the SME total, deferred payment checks (DPC) amounted to USD525 million, which represented 85.4% of the total and a figure higher than the full SME financing obtained in 2012. The second most used instrument was FT, which accounted for 9.7% of the accumulated amount (USD60 million). As for the issuance of SME CB, it reached USD30 million and accounted for 5% of the total. It is relevant to mention that there was no STDS issuance by SMEs over 2013.

It is interesting to note that from 2003 to December 2013, 12,130 SMEs accessed financing through the local capital markets.

As for SME financing, the Buenos Aires Securities Market (MERVAL in its Spanish initials) and the Buenos Aires Stock Exchange (BCBA in its Spanish initials) implemented the trading of a Stock Market Promissory Note in mid December 2013. This new instrument would allow SMEs to obtain financing within a five-year term maximum. Trading in this instrument is expected to begin during the course of 2014.

(3) CPD: Deferred Payment Cheques. Interest Rate is a traded-value weighted average.

## HIGHLIGHTS OF YEAR 2013

- According to INDEC's Monthly Indicator of Economic Activity (EMAE), Argentinean GDP grew 4.9% in 2013. It is worth noting that these are preliminary figures, since the definitive ones will depend on the release of the 4Q-13 figures in March 2014. Besides, there is another thing which could modify the final growth rate of 2013: the introduction, since January 2014, of a new consumer price index.
- In 2013, industrial production measured by INDEC's Manufactures Monthly Production Index (EMI) fell 0.2% against year 2012. From the 12 subindexes comprising the EMI, only 3 showed increases since the previous year: Non-metallic minerals (+6.2%), Automobiles (+3.7%) and Basic Metals (+3.4%). While Chemical Products and Substances experienced no change year-over-year, the remaining sectors experienced lower production levels than in 2012. The three highest reductions were those of: Printing and Publishing (-6.1%), Tobacco (-5.1%) and Metal-mechanic Industry (-3.9%).
- After falling 3.2% y-o-y in 2012, construction activity (according to INDEC's Index of Construction Activity - ISAC), went up by 4.6% y-o-y in 2013. The subindex for private building construction (residential and non-residential) explained nearly 70% of the annual increase, while the subindex on road constructions represented 20% of the rise. Concerning infrastructure constructions, they grew 10% y-o-y. On the other hand, oil-industry related constructions were the only ones which fell, with a reduction of 3.2% y-o-y.
- In 2013, tax revenues totaled ARS858 billion, resulting in annual nominal increase of 26%. This figure also implied a 26% of GDP (as of 3Q-13), the highest value for the series since 1993. Revenues coming from VAT (ARS249 billion) explained one third of the annual rise, Income Tax (ARS183 billion) represented one quarter of the increment. None of the main taxes experienced a reduction in its revenues against 2012.
- Non financial public sector primary balance registered a deficit for the second year in a row. With a negative value of ARS22.5 billion (where ARS19.9 billion were December's deficit), this negative result was higher than in 2012 (-ARS4.8 billion) and an all-time-high since 2001. Regarding the financial result, even though it was also negative and a record (-ARS38.8 billion), it could have been larger if the conditions that trigger the payments of the GPD warrants had been met in 2012.
- Having fallen in 2012, exports grew again in 2013. With a total of \$83 billion, sales to the rest of the world were 2.6% higher than in the previous year, being this completely explained by the rise in the quantities exported (+3%), since prices fell (-1%). The same pattern was observed by imports. After declining in 2012, they rose by 8% in 2013 totaling \$74 billion. This increase was due both to higher sold quantities (+5%) and higher prices (+3%).
- As a result of the above mentioned, year 2013 trade balance reached a surplus of \$9 billion which, despite being positive, implied a reduction of 27% y-o-y and the lowest surplus since 2002.
- Retail inflation in 2013 (considering INDEC's CPI) was 10.9%, while the core measure (which excludes regulated and prices with seasonal behavior, named IPC Resto) increased by 10.7%. This contrasts with the average of retail inflation estimates of private consultancy firms, released by the House of Representatives opposition parties' members and known as "*Inflación Congreso*", which posted an annual increase of 28%.

- Between December 2012 and the same month of 2013, formal private sector wages got increased by 25.2% (having gone up by 24.8% in 2012). Concerning the informal sector wages, wages registered an annual rise of 27.7%. Finally, the overall index comprising both sectors grew 26%.
- As from 12-30-13, total deposits of the Argentinean Financial System (ARS+\$) added up to ARS742.4 billion, implying an increase of 16.6% against 2012. From this amount, ARS541.6 billion were private sector deposits, which ended 2013 28% above the level of the end of 2012. If we only take into account dollar-denominated deposits of the private sector, they totaled \$6.9 billion, which resulted in an year-over-year contraction of 13%.
- Loans to the private sector as from December 2013 (monthly average, ARS+\$), reached ARS480.4 billion. This meant an annual increase of 31% and the highest value for the series since 2001. Dollar-denominated loans amounted to \$3.7 billion, sliding 33.5% since 2012.
- In 2013, the peso-dollar exchange rate (Banks ask) got depreciated by 32.6%, ending the year in ARS6.54 per dollar. This was the largest depreciation of the exchange rate since 2001, and the second in Latin America in 2013 (the first was that of Venezuela with 46.5%). Regarding the exchange rate implied by the prices in ARS and in \$ of the sovereign bonds, it ended 2013 at ARS8.82 per dollar, which means a depreciation of 38% since the end of 2012.
- With respect to the Euro, the Argentinean peso lost 38.4% of its value during 2013, being the exchange rate ARS9.005 per Euro by the end of 2013. Finally, the vale of the Brazilian Real was at ARS3.32, representing a depreciation of the peso of 15%.
- In 2013, and for the first time since 2008, the balance of the Argentine Central Bank (BCRA) intervention in the foreign exchange was negative and, also large: \$5.3 billion. Even though the balance was positive in some months of the first half of the year, the BCRA was a net seller in every month since July.
- Due to pressure on the supply of dollars and aiming to create an inflow of foreign currency into the domestic economic, Law 26,860 was enacted by the end of May. This Law allowed those who had assets abroad which hadn't been declared to AFIP (Argentina's IRS equivalent), might bring them back without fines nor charges of money laundering by means of buying two alternative types of bonds. The first was the CEDIN, which intended to foster construction activity and the real estate market. The other option was to buy BAADE, which proceedings were going to finance investments in the energy sector (oil mainly). The total amount obtained by this kind of fiscal pardon, according to the media, was \$607 million by the end of 2013, against \$4 billion expected by the government.
- After having reached \$43.3 billion by the end of 2012 (-6.6% y-o-y), and being that the second year in a row of reductions, Central Bank of Argentina Internal Reserves fell by \$12.7 billion in 2013. In this way, by the end of 2013 they added up to \$30.6 billion, meaning an annual plunge of 29% and the lowest value since November 2006.

(\*) Adjusted prices. Maximum and minimum prices consider only closing prices (not intraday)

Close price is the last traded price of the year. When a '-' is shown, no price was registered for the standard trading (T+3)

Trade value and volume includes all cash and future transactions.

CONCURRENCE MARKET<sup>(\*)</sup>
